Hello Adrien and Nathan,

Speaking about Exercise 2, I don't have some crucial things to comment.
You have lost just a few tenths of point because of presentation of results.

I mean it would be much better (an also easier for me to check results)
if simple baseline and advanced baseline were together on image and
we could see easily the difference between two baselines.
Please, take in account this for further reports.

Anyway this cut didn't really changed your total grade.
For the total grade you actually lost points in Exercise 1. But 5.5 of 6 is great job. :)

Best regards,
Ihor
